

THE DEVON CLINICAL PLACEMENT EXPANSION PROGRAMME (CPEP)

The (CPEP) team works with a number of Devon's nursing/care homes who recognise the value of hosting nursing and allied health profession students in their settings.

Showcasing the care you provide can impact positively on the whole team and help with both recruitment and retention of staff.
Students can also act as a resource.

Home managers have acknowledged that:

AN OCCUPATIONAL THERAPY STUDENT

could undertake seating assessments and support individuals to pursue their hobbies

A DIETETIC STUDENT

could work with an individual to increase their nutritional intake and support the review of menu

A NURSING STUDENT

could support the RNs with all nursing duties, such as wound care, medication administration, catheter care

A PHYSIOTHERAPY STUDENT

could assist with falls risk assessment and support individuals with movement programmes

'Clinical placements in social care are a brilliant way of sharing knowledge, experience and innovative learning and practice across social care and health provision. They are a pure workforce investment in all that is good in Social Care and the NHS and they make such a difference to the lives of the people we support'.

Dr Len Loftis, CEO, The Northam Care Trust
