Certificate details 2.5 hours participatory learning towards NMC revalidation.

*CPEP is a project funded by Health Education England to improve placement capacity for student nurses and student allied health care professionals (AHP's e.g.; dieticians, physio's, OT's, Art therapy students, paramedics, social workers etc.).*

*The Devon CPEP team is focusing on increasing placement capacity across primary and social care provision.*

*There is a wealth of experience and skill in Social Care and amazing opportunities for student to have immersive experiences in these valuable settings.*

*Many students on placement will return to their last placement experience for their first job. We are confident that this project will help improve recruitment of nurses and AHP's and help change negative perceptions of Social Care.*

Trainer: Cathy Rant BSc (Hons) Nursing, RN, Cert Ed. ILM Level 5, BIA, Train the Trainer.
